

COUNTER7 TECHNOLOGIES LLC

CAPABILITY STATEMENT

Enterprise Engineering | Database Modernization | Cybersecurity

Practical technical support for government agencies and prime contractors.

COMPANY OVERVIEW

Counter7 Technologies engineers and modernizes business-critical software, APIs, and integrated systems. We support prime contractors with C++, Java, C#, Angular, cross-platform development, database modernization, and security-focused integration.

CORE CAPABILITIES

Enterprise Engineering

C++, Java, C#, Angular, APIs, cross-platform SDKs, systems integration, build engineering, and legacy application modernization.

Cybersecurity & Risk

Application and API security assessments, vulnerability analysis, authentication design, and actionable remediation roadmaps.

Database Modernization

Oracle migration planning, upgrade support, data reconciliation, and automated integrity verification.

Identity & Access

PKI architecture, certificate lifecycle workflows, access control, and secure integration strategies.

COUNTER7 CORPORATE PAST PERFORMANCE

Android Application Engineering | Commercial Subcontract

Java application development, architecture design, device communication through Android APIs, UI testing, and full lifecycle delivery on an existing application.

Prototype Engineering | Commercial Subcontract

Qt application development using custom development boards for a proprietary prototype. Client and product identities withheld.

FOUNDER / KEY PERSONNEL EXPERIENCE

James Carter brings employer-based experience in biometric SDKs, C++/Java integration, ARM embedded systems, OpenSSL, X.509, and enterprise application delivery. At HID Global, reduced Raspberry Pi build times by 10x and diagnosed USB/UVC issues using Wireshark and a USB analyzer.

Employer-based experience is distinct from Counter7 corporate past performance.
